CORE COMPETENCIES

Forecasting & Statistics

Time Series, Trend Analysis, KPIs

Reporting Automation

Power BI, Excel VBA, Python

Data Management

SQL, ETL Pipelines, Documentation

LANGUAGES

English: Professional (C1)

French: Native

Spanish: Native

DATA SCIENCE & AUTOMATION INTERN

Specialized in Forecasting & BI Reporting

Why I fit the Structural Heart Division's needs: You need an intern to "develop sales forecasts," "automate recurring reporting," and "analyze inventory." My profile (B.U.T. STID) is built for this. I combine **Statistical Rigor** (Time Series Analysis) with **Technical Automation** (Python/Power BI). I don't just analyze data; I build the automated tools that make reporting effortless for management.

RELEVANT EXPERIENCE: AUTOMATION & ANALYTICS

Automated Reporting Pipeline (ETL)

Python | Excel Automation

- Relevance:** "Automate recurring reporting tasks using Power BI, Excel."
- Action:** Engineered a pipeline to automatically ingest raw data, clean it, and update dashboards without manual intervention.
- Impact:** Reduced time spent on manual data entry and improved data accuracy for decision-making.

Trend Analysis & Predictive Modeling

Time Series | Statistics

- Relevance:** "Develop demand-based sales forecasts by analyzing historical data."
- Experience:** Applied statistical methods (Time Series, Regression) to analyze historical trends (Game Telemetry/Sales proxy) and predict future outcomes.
- Identified "abnormal demand" patterns (Anomaly Detection) to trigger alerts.

KPI Dashboarding & Documentation

Power BI | Process Flows

- Relevance:** "Create and maintain documentation including process flowcharts."
- Designed comprehensive **Power BI** dashboards to monitor performance KPIs.
- Documented technical processes (User Guides) to ensure tool adoption by non-technical stakeholders (similar to Marketing/Sales teams).

EDUCATION

B.U.T. Statistics and Business Intelligence (STID) 2022 – Present | France

- Specialized in **Statistical Forecasting**, **Data Mining**, and **Business Intelligence**.
- Curriculum includes: Inventory Management concepts, Database Systems (SQL), and Reporting.

INTERNATIONAL MINDSET

Trilingual: Native French/Spanish, Fluent English. Capable of analyzing input from diverse "EMEA Regions."

Collaboration: Experience working with cross-functional teams (E-sport Management) to implement process improvements.
